

## **PIENAAR ENERGY (PTY) LTD**

# **What type of solar inverter is it**

## Overview

---

Types of Solar Inverters: Key types include grid-tied inverters for net metering, off-grid inverters for remote locations, hybrid inverters with battery backup, and microinverters for individual panel performance. A solar inverter is really a converter, though the rules of physics say otherwise. ) Most homes use AC rather than DC energy. DC energy is not safe to use in homes. Normal inverters use direct current from their batteries, but solar inverters are a bit different. Knowing the different types helps you pick the right fit for your energy needs and budget.
