# **What types of projects are included in the energy storage policy**

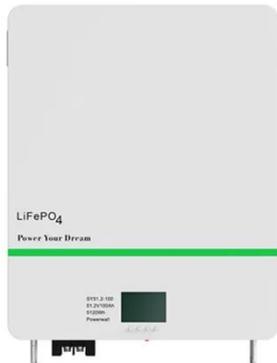

## Overview

---

Around 16 states have implemented some form of policy directed at energy storage, which broadly fall into five categories: procurement targets, regulatory adaptation, demonstration programs, financial incentives, and consumer protections. Reaching Full Potential: LPO investments across energy storage technologies help ensure clean power is there when it's needed. The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to. These targets set a required amount of energy storage, typically expressed in megawatts (MW), that must be developed or procured by a certain date. This brief presents findings and recommendations from the long-duration energy. ishing decarbonization goals and programs. It also summarizes findings from a 2022 survey of energy storage developers, and it provides a “deeper dive” into key state energy storage policy priorities and the challenges being encountered by some of the leading decarbo strategically sited energy. The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap. This SRM outlines activities that implement the strategic objectives facilitating safe, beneficial and timely storage deployment;.
