

## **PIENAAR ENERGY (PTY) LTD**

# **Which Niger Telecom has the most solar sites**

## Overview

---

Orange Niger has completed the first phase of a project to connect remote communities that were previously underserved by any form of telecoms services. The telco worked with Irish telecoms vendor Altobridge for the network rollout, which is powered by sustainable energy sources. Per the company's statement, the project, which will be implemented in phases, will begin with the. Niger Telecoms has announced the installation of 16 new sites to extend mobile telephony services to remote areas. Project aims to boost connectivity in underserved. The Niger Solar Electricity Access Project (NESAP), aimed at enhancing electricity access in rural and peri-urban areas of Niger through solar energy, started in 2017 and has built 15 solar power plants. This project, funded by the World Bank through the International Development Association (IDA).
