Which equipment in the base station site needs to be grounded

Overview

Placing an 8' ground rod into the ground directly below the antenna is recommended for a base station. All these connections should be sealed, preferably with a Coax Seal. Grounding is a basic communications procedure, each Soldier should know how and why to perform grounding pr e grounding devices for tactical equipment and systems. IN ELECTRICAL STATIONS INCLUDING TRANSMISSION AND DISTRIBUTION SUBSTAT GR THAN 8 FT FROM THE FENCE. THE FENCE SHALL BE GROUNDED SEPARATELY FROM THE GRID UNLESS OTHERWISE NOTED ON THE A PROPRIATE PROJECT DRAWING. SEE APPLICATION. From the reading i have done, my understanding is that all my equipment in the shack needs to be connected to a single point ground which runs a ground wire outside to the ground rod. When i connect it to a DC power supply in the shack, does the mobile unit need to be grounded?

From what i can see. Proper grounding of your equipment is very important. I know of cases where operators have gotten shocks while keying up and touching the mic to their lips.

Which equipment in the base station site needs to be grounded

Proper Base Station & Mobile Grounding

The radio, amplifier, tuner, meters, TVI filter, etc., should be connected together and grounded. This will usually help prevent RFI problems and RF feedback, which causes audio distortion and squealing in ...

Do I ground a mobile unit when used as a base station.

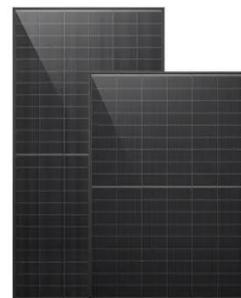

Once your external antennas and feedlines are grounded for lightning safety (and that ground bonded to your service panel), you probably don't need any extra ground connections in the shack.
