

**PIENAAR ENERGY (PTY) LTD**

# **Which photovoltaic panel can be used for several years**

## Overview

---

Premium panels deliver superior long-term value: While premium panels with 0.25% degradation rates cost 10-20% more upfront, they produce 11.5% more electricity over 25 years compared to standard panels, often justifying the higher initial investment through extended productive life and better. The best solar panels are built for the long haul. Most are backed by 25- to 30-year performance warranties, and in real-world conditions, many keep producing power well beyond that. But lifespan isn't just about whether a panel still functions; it's about whether it's still delivering the return. Solar panels are designed to be durable and long-lasting, with most manufacturers offering warranties that guarantee performance for 25 to 30 years.
