

PIENAAR ENERGY (PTY) LTD

Which three-phase inverter is best in New Zealand

IP65/IP55 OUTDOOR CABINET

IP54/55

OUTDOOR ENERGY STORAGE CABINET

OUTDOOR BATTERY CABINET

Overview

In New Zealand, we strongly recommend GoodWe's range of inverters. GoodWe's main advantage is having 3 MPPT's, which allow greater flexibility on how panels can be arranged and distributed on your roof to generate the most power. It uses three different phases of alternating current instead of one, allowing us to have higher transmission voltage and safer, more reliable systems, particularly where power-intensive appliances are used. Here's a schematic of how 3-phase power works: (source: GenServe) The total available power. Maybe you should get a three phase inverter. 0 kW perfectly meets all the requirements of large-scale installations. The Austrian company, Fronius, has long been producing inverters that have topped lists of the world's best inverters. Their inverters bring peerless European engineering and finish quality, alongside market-leading efficiency.

Fronius Symo Inverters

Both three-phase electricity and solar panels are hugely beneficial, but their combination can cause issues in places

- 
Efficient Higher Revenue
 - Max. Efficiency 97.5%
 - Max. PV Input Voltage 600V
 - 150% Peak Output Power
 - 2 MPPT Trackers, 150% DC Input Oversizing
 - Max. PV Input Current 16A, Compatible with High Power Modules
- 
Intelligent Simple O&M
 - IP65 Protection Degree: support outdoor installation
 - Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
 - DC & AC Type II SPD: prevent lightning damage
 - Battery Reverse Connection Protection
- 
Flexible Abundant Configuration
 - Plug & Play, EPS Switching Under 10ms
 - Compatible with Lead-acid and Lithium Batteries
 - Max. 6 Units Inverters Parallel
 - AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation

with phase-accurate billing, such as here in New Zealand. But the much-respected ...
