

PIENAAR ENERGY (PTY) LTD

Will solar power generation cause power outages

Overview

Despite what some biased narratives suggest, wind and solar generation are rarely the initiating cause of large, storm-driven outages. If you have solar and the power goes out, your power will go out, too—unless you have a backup system. electrical code requires rapid shutdown of a solar system to protect emergency workers and prevent dangerous backfeed current from passing onto distribution lines. To separate the rhetoric from the operational reality, Electrek spoke with Leah Qusba, CEO of GoodPower, a. Will your solar system keep your lights on while your neighbors sit in the dark?

Unfortunately, there isn't a simple yes or no answer to that question. Solar power systems are designed to shut down during a power outage: This is a safety measure to protect utility. Hurricanes and other extreme weather increasingly threaten to disrupt energy systems, and distributed generation is generally considered an effective recourse to grid-wide power outages caused by severe storms and other hazards. That doesn't mean solar leaves you stranded.

Will solar power generation cause power outages

Solar & Power Outages: What Actually Happens

During a power outage, grid-tied solar systems automatically shut down. This is a safety measure to prevent your solar energy from flowing through potentially damaged power lines and ...
