

**PIENAAR ENERGY (PTY) LTD**

# **Wind blade power generation industry**

## Overview

---

The global wind turbine blade market was valued USD 95.3 billion in 2024 and is estimated to grow at a CAGR of 6%. Wind turbine blades are large, aerodynamic components that capture kinetic energy from the wind, converting it into mechanical energy for electricity generation. Onshore will lead the application segment with a 58% market share. The wind turbine blade market is set to. This manuscript delves into the transformative advancements in wind turbine blade technology, emphasizing the integration of innovative materials, dynamic aerodynamic designs, and sustainable manufacturing practices. 26% during the forecast period.

### Global Wind Turbine Blade Market, Size, trends, overview, and ...

Over the forecast period of 2024-2030, the market is anticipated to grow at a CAGR of 13.4%. The wind turbine blade market is a rapidly growing and dynamic industry that is playing a critical role in the ...

### Innovations in Wind Turbine Blade Engineering: Exploring Materials

Through an exploration of the evolution from traditional materials to cutting-edge composites, the paper highlights how these developments significantly enhance the efficiency, ...

[Get Price](#)

### Supply Chain and Blade Manufacturing Considerations in the ...

Wind turbines are composed of more than 8,000 individual components, and about 90% of the value is captured in three main parts: blades, towers, and nacelles (Tegen, et al. 2013). Blades are typically ...

## Wind Turbine Blade Market Size, Share , Global Report [2034]

Asia Pacific dominated the wind turbine blade market with a market share of 50.49% in 2025. Wind turbine blades are the parts of a wind turbine that convert wind's kinetic energy into ...
