

PIENAAR ENERGY (PTY) LTD

Wind power generation project address

Overview

The United States Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical specifications. The creation of this database was jointly funded by the U. Department of Energy. The Wheatridge Renewable Energy Facility is the first development of its scale in North America to co-locate wind and solar generation with battery storage, making the clean energy future a reality in Oregon. onshore wind generates enough electricity to power over 46 million homes.

Wind power generation project address

10 US wind energy projects starting in 2026 and beyond

Explore top U.S. wind energy projects launching from 2026, with insights on renewable trends, onshore vs offshore growth, and policy impacts on clean power.
