

PIENAAR ENERGY (PTY) LTD

Wind turbine blades with photovoltaic panels

Overview

On Octo, energy company Soleolico unveiled the world's first wind turbine equipped with photovoltaic panels mounted on rotating blades, aptly named 'sails. Images courtesy Soleolico In an era increasingly focused on renewable. In an age of finding creative ways to recycle end-of-life products, a Swiss startup is using retired wind turbine blades as solar panel support beams. ' This innovative design allows the turbine to harness both wind and solar energy, enabling it to generate electricity 24/7. Developed over more than a decade of research, with an investment of over 5 million euros and the evolution of more.

Wind turbine blades with photovoltaic panels

Solar-powered Wind Blades: A Groundbreaking Innovation in

On Octo, energy company Soleolico unveiled the world's first wind turbine equipped with photovoltaic panels mounted on rotating blades, aptly named 'sails.'. This innovative ...
