

**PIENAAR ENERGY (PTY) LTD**

# **Yangfan Solar Power Plant**

## Overview

---

The plant, situated in the Yalong River Basin of the Tibetan Autonomous Prefecture of Garze in southwest China's Sichuan Province's Yajiang County, will cover the needs of 700,000 households for a whole year with its annual generating capacity of 2 billion kilowatt-hours (kWh). CSP development potential. Approximately 11% of China's land is suitable for the construction of CSP stations, of which more than 99% is concentrated in five provinces in the northwest region (i.e., Xinjiang, Tibet, Inner Mongolia) to generate electricity. The station generates 390 million kilowatts of. In Hanggin Banner and Dalad Banner, each site is set to develop 2 GW of solar power, with Dalad Banner planning an expansion to a total capacity of 13. Surpassing Midong, it will become the largest photovoltaic station. The global automotive supplier already uses renewable energy at all its locations in Europe - some of which are already operating with 100% green energy - and now. Breaking through complex power grid conditions, Hongzheng Energy Storage is assisting Yangfan Copper Industry in refining its energy management. 698MW commercial energy storage project at Yangfan Copper Industry in Anhui successfully achieved full-capacity grid connection.
